

MS130 AT-A-GLANCE

Power More Possibilities With MS130

Deliver seamless user experiences with **more bandwidth**, **more flexibility**, and **less overhead**.

Secure and frictionless connectivity starts at the switch.

More bandwidth

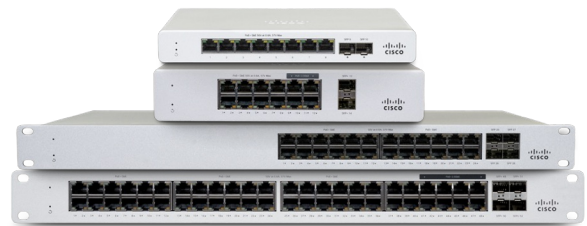

Supercharge uninterrupted experiences with **cost-effective mGig and SFP+ options**.

More flexibility

Adapt and power more new devices with **diverse port counts and PoE+ options**.

Less overhead

Easy to adapt and scale with powerful, **centralized network management**.

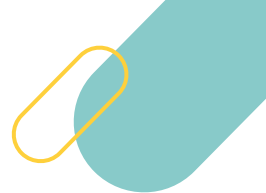

Up to 2.5 GbE

SFP/SFP+ options

PoE+ options

8/12/24/48 port

SWITCH TO CLOUD-FIRST NETWORKING

Meet the new MS130 access switch

8, 8P, and 8P-I

8x 1 GbE
SFP, PoE+, internal
PSU option

8X and 12X

2x/4x 2.5 GbE
PoE+; SFP+

24/24P and 48/48P

24x/48x 1 GbE
SFP and PoE+ option

24X and 48X

6x/8x 2.5 GbE
PoE+; SFP+

Versatile and compact desktop switches

Powerful and full-size rack-mount switches

Scale your network securely with Meraki cloud-first switching

Zero-touch provisioning

Pre-provisioning of hardware and easy plug-and-play deployments without dedicated onsite IT staff.

Troubleshoot from miles away

Faster mean time to respond (MTTR) with powerful tools like cable testing, cycle port, and device reboot—from anywhere.

Manage it all

Adopt Meraki products rapidly on one centralized, cloud-managed platform with unmatched visibility.

Stay up to date

Easy-to-manage and schedulable firmware upgrades across the organization with auditable logs.

Smarter at every layer

Centralized visibility of entire network and application recognition; get detailed telemetry on every connection path.

Security without headache

Provide an additional layer of security based on the intent of the user, device, and application.*

* MS130 mGig (-X) models are hardware-ready for the Adaptive Policy feature with MS17 firmware upgrade and advanced license.
